Spring Boot 2.5.0-RC1 available now

RELEASES | PHIL WEBB | APRIL 15, 2021 4 COMMENTS

In preparation for the GA release on May 20 2021, I am pleased to announce that Spring Boot 2.5.0-RC1 has been released and is available from our milestone repository. This release adds a number of new features and bug fixes.

Highlights of the RC include:

- A new actuator endpoint for Quartz
- Support for database initialization with R2DBC
- Micometer metrics support for Spring Data repositories and MongoDB
- Support for Gradle 7.0

For a complete list of changes and upgrade instructions, please see the Spring Boot 2.5.0-RC1 Release Notes on the wiki and the updated reference documentation.

Spring Boot 2.4.5 available now

RELEASES | STÉPHANE NICOLL | APRIL 15, 2021 2 COMMENTS

On behalf of the team and everyone who has contributed, I'm happy to announce that Spring Boot `2.4.5` has been released and is now available from Maven Central.

This release includes 57 bug fixes, documentation improvements, and dependency upgrades. Thanks to all those who have contributed with issue reports and pull requests.

How can you help?

If you're interested in helping out, check out the "ideal for contribution" tag in the issue repository. If you have general questions, please ask on stackoverflow.com using the `spring-boot` tag or chat with the community on Gitter.

⭐ New Features

- Provide a configuration property for the observation patterns of Spring Integration components #33099

🐞 Bug Fixes

- io.micrometer.tracing.Tracer on the classpath breaks AOT processing for tests #33298
- Tracer library HTTP instrumentation is auto-configured unnecessarily #33287
- Auto-configuration ignores user-provided ObservationConventions #33285
- `ScheduledBeanLazyInitializationExcludeFilter` is auto-configured even when annotation-based scheduled has not been enabled #33284
- SpringBootContextLoader prints banner twice when using a `@ContextHierarchy` #33263
- Properties migrator causes an application to fail to start if it tries to map a property whose metadata data entry contains an invalid configuration property name #33250
- Wavefront MeterRegistryCustomizer is not applying application tags from application.properties #33244

Spring Boot takes an opinionated view of building production-ready Spring applications. Favors convention over configuration and is designed to get you up and running as quickly as possible.

See spring.io/projects/spring-boot for details.

Supported Versions

Spring Boot 2.3 and 2.4 are the actively maintained versions. See the "Supported Versions" page for further details and EOL dates.

Spring Boot

build passing | gitter join chat | Revved up by Gradle Enterprise

Spring Boot helps you to create Spring-powered, production-grade applications and services with absolute minimum fuss. It takes an opinionated view of the Spring platform so that new and existing users can quickly get to the bits they need.
